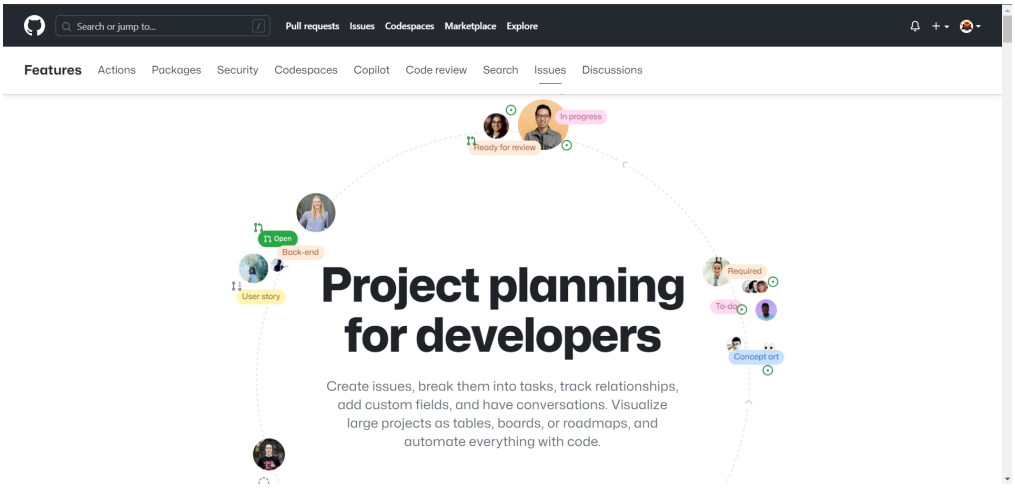
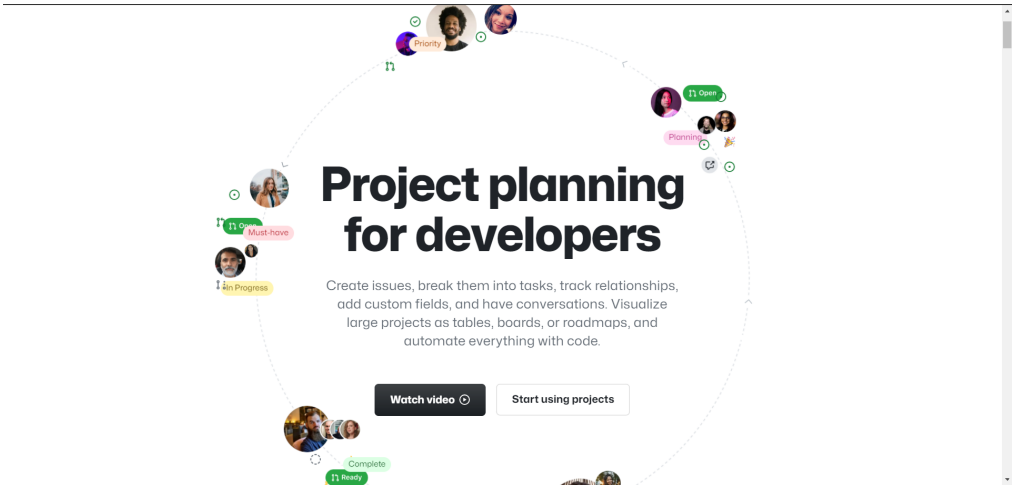
Github Issues:

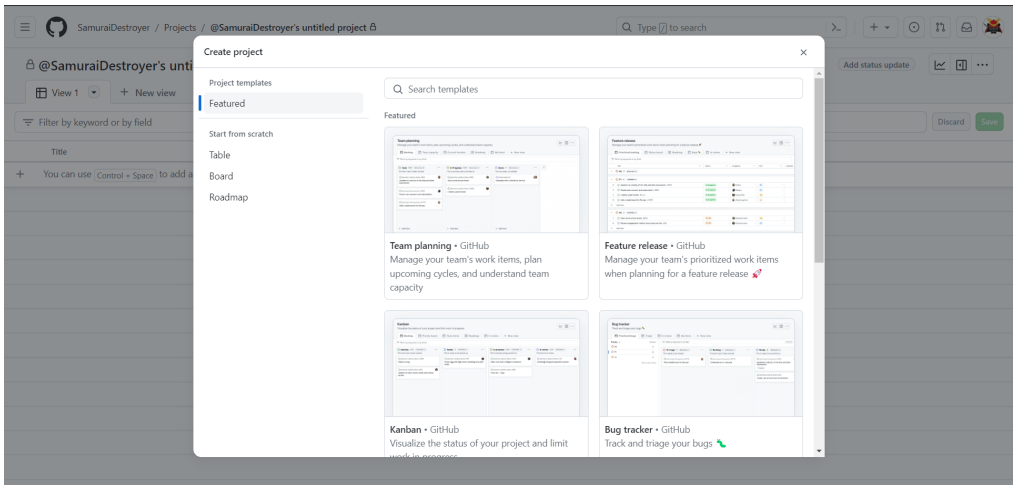
- Using Github Issues for bug reporting tools
- Go to the Github Issues link: https://github.com/features/issues



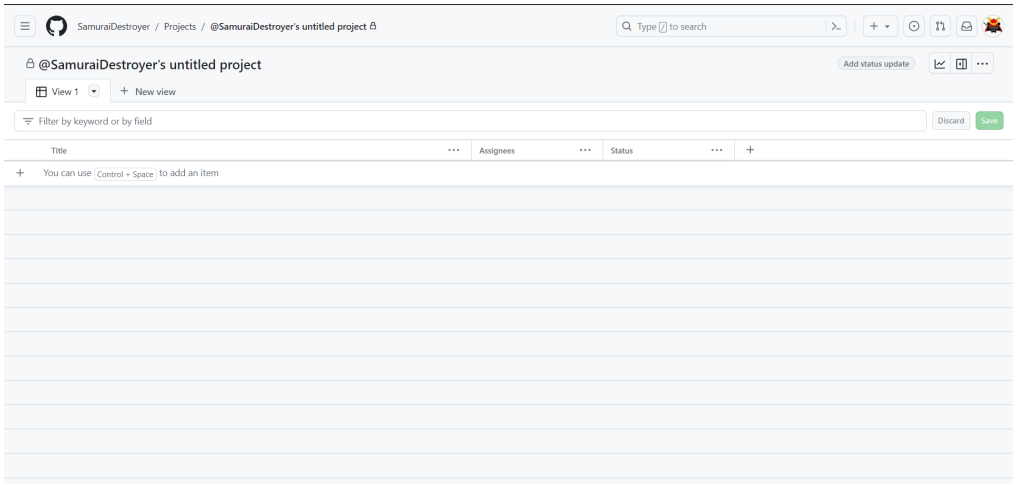
- This is the home page of Github Issues



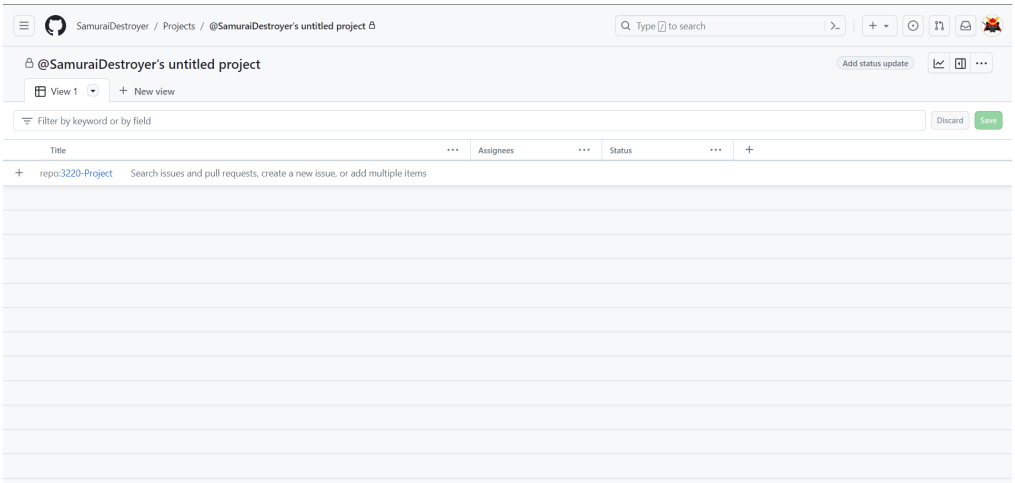
- Click on the button, “Start using projects” to start using Github Issues.



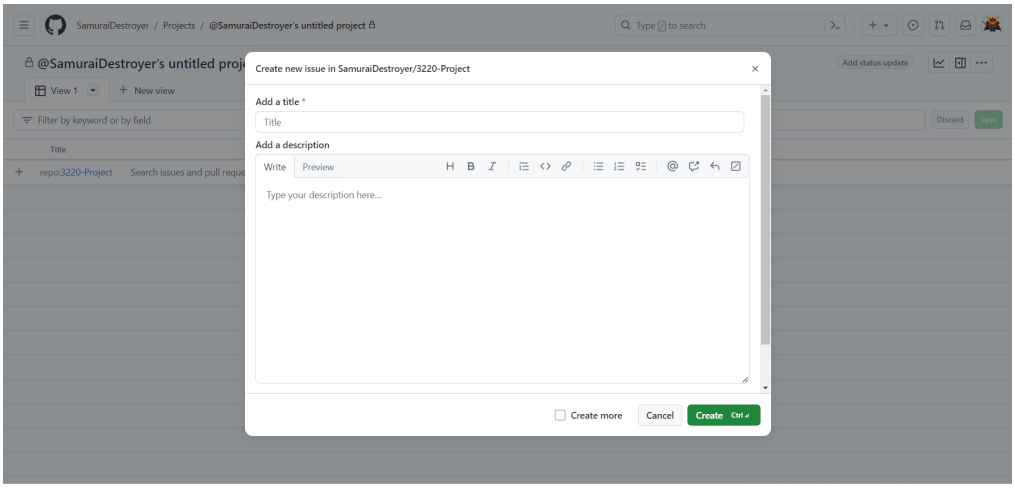
- This shows the create project menu and templates, so you can choose whatever you want for your project.



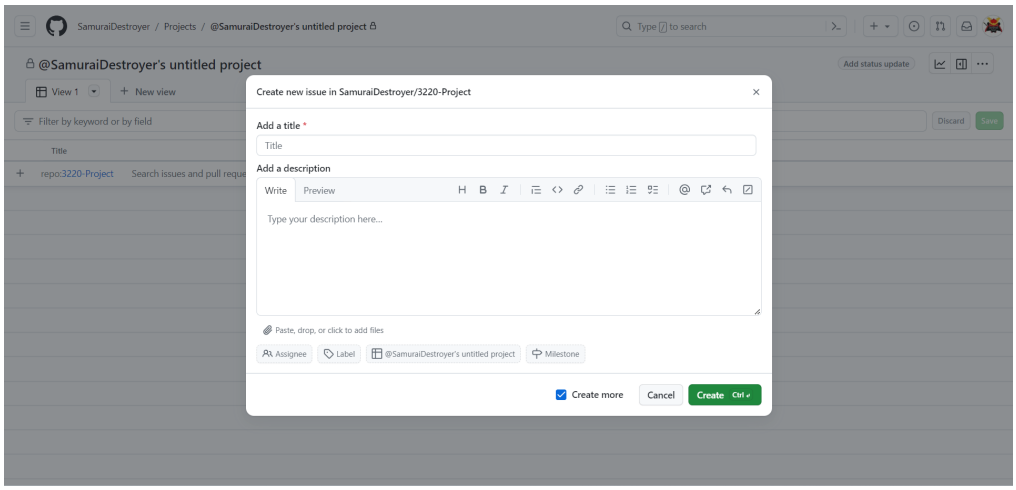
- This shows the empty project that allows to add an item by clicking "Control + Space", if you click the + of the left, you will be given an option of choosing to "create a draft", "type # to select a repository", "create new issue", or "add item from repository"



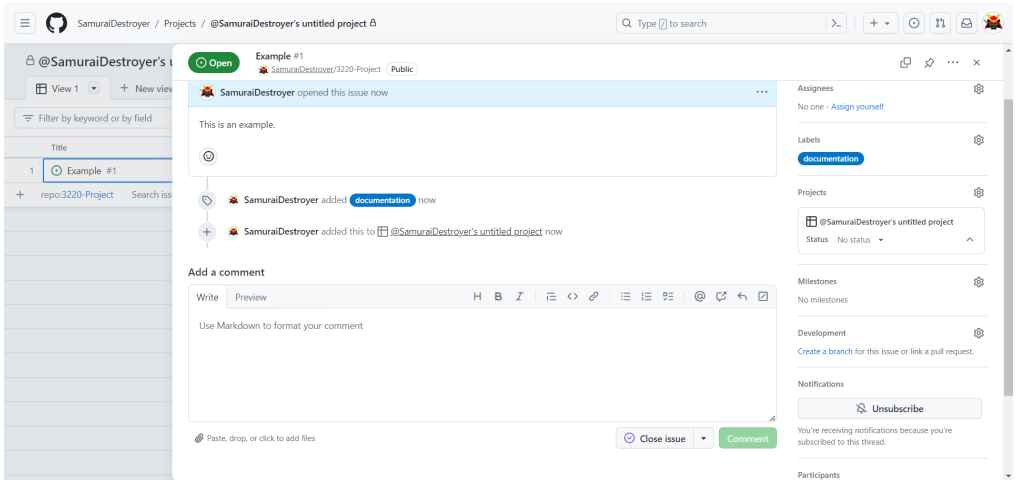
- This is an example when choosing "type # to select a repository", in this case the repository is 3220-Project, then you create a new issue for that repository.



- This shows that you can create a new issue in 3220-Project repository, add the title of the issue and add the description of the issue. It also gives you the option to check the box of "Create more". Then you can either "Cancel" or "Create" the issue.



- This shows the "Assignee", which let you assign the issue up to 10 users that are involved with the project, "Label" gives the label of whether it is a bug, documentation, duplicate, enhancement, good first issue, help wanted, invalid, question, or wontfix, and "Milestone", which set up the milestone of the project.



- This shows when you created a new issue and click on that new issue, it shows the issue, which allows you and the other users if they are assigned with the issue to view the issue, comment about the issue, create a branch with the issue or link a pull request, etc.

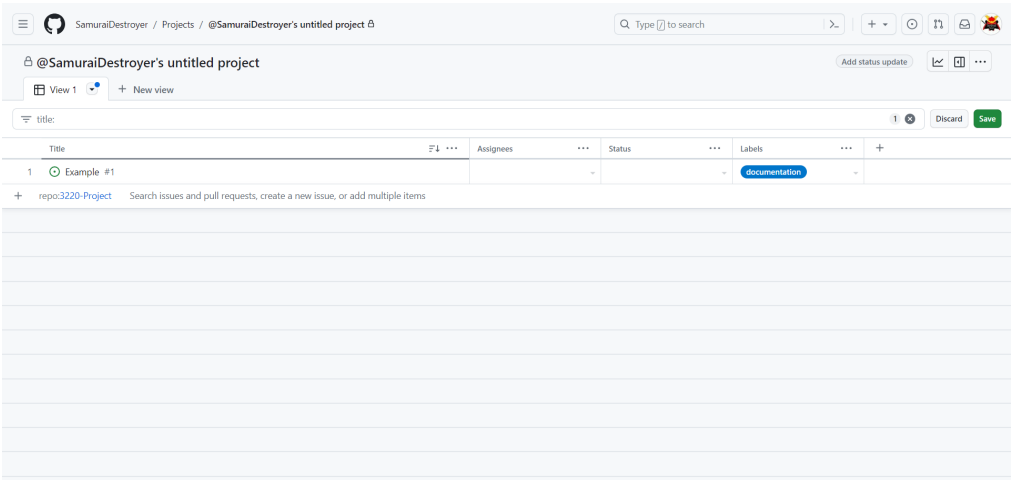
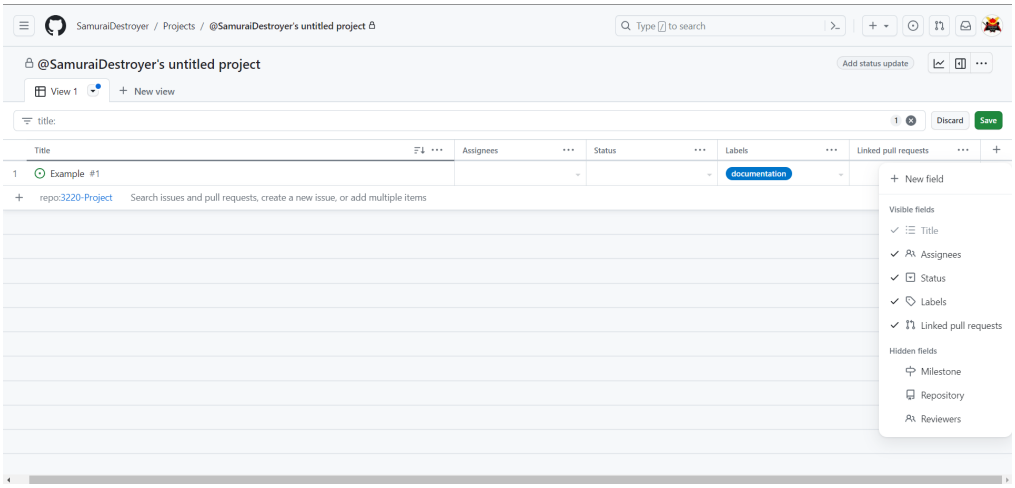
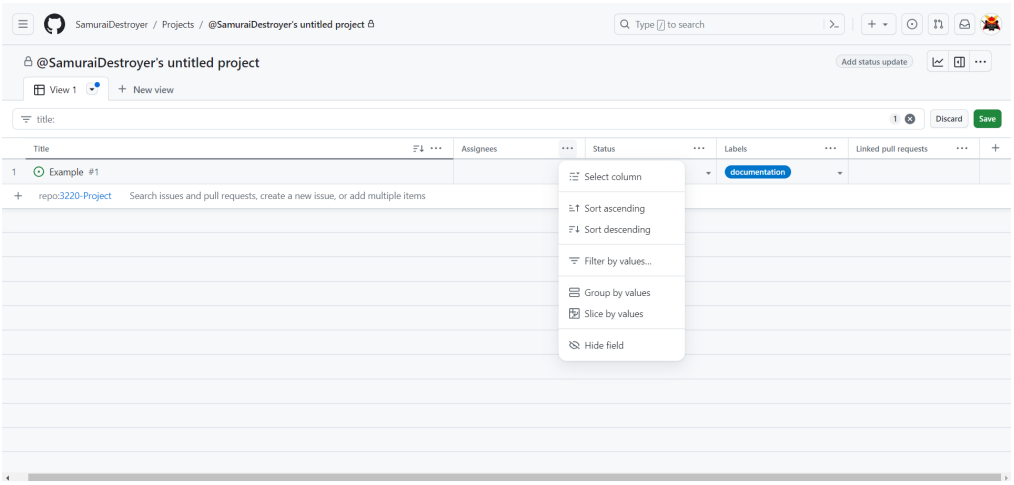
- The “Assignees” and “Status next to “Title”, “Assignees” allows you to assign the newly created issue to other users who are involved in the project and “Status” allows you to select an item, which are “Todo”, “In Progress”, “Done”, and create a new option for the item.





- The "+" sign beside the "Labels" can be clicked to create a new field, which shows a menu to add a new "Visible Field" or "Hidden Field".



- The 3 dots beside the "Assignees" can be clicked to show a menu that allows to choose to "Select column", "Sorting ascending", "Sort descending", "Filter by values", "Group by values", "Slice by values", or "Hide field". This also applies to other fields.
- Be sure to save the changes for the issue.
